			ART UNIT 2178	PAPER NUMBER
DATE MAILED: 11/29/2005				

Please find below and/or attached an Office communication concerning this application or proceeding.

# Office Action Summary

Application No.

09/832,952

Applicant(s)

UEGURI ET AL.

Examiner

Gregory J. Vaughn

Art Unit

2178

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on 19 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 9-11,13-15,34-42 and 52-57 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 9-11,13-15,34-42 and 52-57 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Application History*

1. This action is responsive to the Request for Continued Examination, filed on 9/19/2005.
2. Applicant has cancelled claims 12 and 16; and amended claims 9-12, 13-15, 34, 39-42, 52 and 54.
3. Claims 9-11, 13-15, 34-38, 39-42 and 52-57 are pending in the case, claims 9, 13, 34 and 39 are independent claims.
4. A request for continued examination filed under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after a final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office Action (dated 5/17/2005) has been withdrawn pursuant to 37 CFR 1.114.
5. The examiner's rejection of claims 12 and 16, made under 35 USC 102, as being anticipated by Levac et al. US Patent 6,034,970 as recited in the previous office action (dated 5/17/2005) are withdrawn in view of the cancelled claims.
6. The examiner's rejection of claims 9-11, 13-15, 34-38, 39-42 and 52-57, made under 35 USC 102, as being anticipated by Levac et al. US Patent 6,034,970 as recited in the previous office action (dated 5/17/2005) are withdrawn as necessitated by the amended claims.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

*“(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.”*

8. Claims 9-11, 13-15, 34-38, 39-42 and 52-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levac et al. US Patent 6,034,970, filed 7/2/1997, patented 3/7/2000 (hereinafter Levac) in view of Whitledge et al., US Patent 6,925,595, filed 8/5/1998, patented 8/2/2005 (hereinafter Whitledge).
9. **Regarding independent claim 9**, Levac discloses a server in Figure 2 at reference sign 28 (shown as “Message Server”). Levac discloses a detection unit for detecting new text inserted in a web page. Levac recites: *“The data acquisition program may include a Web scanning program, which is configured to monitor one or more Internet Web sites that are of interest to a designated message recipient. Upon detection of a modification to the information content of the Web site, the data acquisition program can update the variable value in the message template with information providing a notification of the modification”* (column 10, lines 54-61). Levac also discloses converting the text to phonetic character strings. Levac recites: *“As illustrated*

Art Unit: 2178

*in FIG. 5, system 10 preferably includes various other types of protocol converters 24a-n that convert messages and variable data to protocols, such as are compatible with fax machines, e-mail systems, HTML files, audio devices (audio.wav)" (column 7, lines 49-53).*

Levac further discloses transmitting a character string representing the text to a registered user. Levac recites: *"The data acquisition program can then convey the updated message template through automated source interface 22. The notification can simply be a communication alerting the message recipient of the modification (e.g., "www.xxx.com was updated on 1/1/97"), or can include a portion of the modified information content, such as new text"* (column 10 lines 61-67).

Levac discloses deleting text. Levac recites: *"In addition to routing messages to protocol converters 24a-n, message server 14 also transmits server commands, such as the activate message command discussed previously. Other server commands can include a "delete message" command and a "delete all messages" command"* (column 9, lines 25-29). Levac fails to disclose deleting character strings from a file. Whitledge teaches deleting character strings from a file. Whitledge recites: *"With the Document Object Model, programmers can create and build documents, navigate their structure, and add, modify, or delete elements and content. Elements, sub-elements, text, etc. in an HTML or other hypertext electronic documents can be accessed, changed, deleted, or added using the Document Object Model"* (column 25, lines 31-36).

Therefore, it would have been obvious, to one of ordinary skill, at the time the invention was made to combine the text deletion capabilities of Whitledge with the intelligent messaging system of Levac in order to provide "*a method and system for converting the content of electronic data for a desired network device*" (Whitledge, column 1, lines 18-19).

10. **Regarding dependent claim 10**, Levac discloses transmitted text that includes a title of the web page with the text of the web page. Levac recites: "*Preferably, the .msa file created by message file generator 23 may incorporate, and in some instances must incorporate, the following information: 1. OWNER: identifies the user who created the file; consists of the length of the user's name followed by the user's name; required stream. 2. FILENAME: identifies the name the file was saved as by the user; consists of the length of the FILENAME followed by the FILENAME; required stream. 3. FILETYPE: identifies the format (for example, .wav or .msw) of the actual message as generated embedded within the .msa file; consists of the length of the FILETYPE followed by the FILETYPE; required stream. 4. DATA: contains the message and associated components, such as text characters or control codes, in the format defined by the FILETYPE stream; consists of the length of the DATA array followed by the DATA array; required stream*" (column 4, lines 48-67), (compare "*title*" with "*File Name*" and "*text*" with "*Data*").

Art Unit: 2178

11. **Regarding dependent claim 11**, Levac discloses the transmission of a creation date with the text. Levac recites: *"Message file generator 23 embeds the actual message in the .msa file together with primary data streams specifying essential message parameters, such as date, time"* (column 4, lines 39-42).
12. **Regarding claims 13-15**, the claims are directed toward a method for the apparatus of claims 9-11, respectively, and are rejected using the same rationale.
13. **Regarding independent claim 34**, Levac discloses a reception unit for receiving new text inserted in a web page. Levac recites: *"The data acquisition program can then convey the updated message template through automated source interface 22. The notification can simply be a communication alerting the message recipient of the modification (e.g., 'www.xxx.com was updated on 1/1/97'), or can include a portion of the modified information content, such as new text"* (column 10 lines 61-67).

Levac also discloses converting the text to synthetic speech. Levac recites: *"As illustrated in FIG. 5, system 10 preferably includes various other types of protocol converters 24a-n that convert messages and variable data to protocols, such as are compatible with fax machines, e-mail systems, HTML files, audio devices (audio.wav)"* (column 7, lines 49-53).

Levac further discloses a speech output means in Figure 5 at reference sign 18h (shown as "Speakers").

Art Unit: 2178

Levac and Whitley disclose the detection unit, deleting unit, conversion unit, and transmission unit as described in the rejection of claim 9 described above.

14. **Regarding dependent claim 35**, the claim contains substantially the same subject matter as claim 10, and is rejected using the same rationale.
15. **Regarding dependent claim 36**, the claim contains substantially the same subject matter as claim 11, and is rejected using the same rationale.
16. **Regarding dependent claims 37**, Levac discloses outputting a predetermined sound prior to outputting the synthetic speech. Levac recites: *"The mailbox notifies the user that a new message has been received"* (column 1, lines 34-35).
17. **Regarding dependent claims 38**, Levac discloses a computer and a telephone system. Levac recites: *"Accordingly, a message generated by a source (e.g., an individual or user, a real-time data source, a sensor or other software applications or hardware devices) can be automatically conveyed to diverse communication devices, such as networked personal computers, message marquees (e.g., large character displays), telephone systems"* (column 3, lines 49-55).
18. **Regarding claims 39-42**, the claims are directed toward a method for the apparatus of claims 34-37, respectively, and are rejected using the same rationale.

Art Unit: 2178

19. **Regarding claim 52**, the claim contains substantially the same subject matter as claim 9, and is rejected using the same rationale.
20. **Regarding claim 53**, the claim contains substantially the same subject matter as claim 34, and is rejected using the same rationale.
21. **Regarding claims 54-57**, the claims are directed toward defining the invention's phonetic character string as characters for representing pronunciation of words. Levac discloses phonetic character strings used for pronunciation of words. Levac recites: "*Types of messages include text, voice, or text-to-speech messages*" (column 3, lines 62-63).

#### ***Response to Arguments***

22. Applicant's arguments with respect to claims 9-11, 13-15, 34-38, 39-42 and 52-57 have been considered but are moot in view of the new ground(s) of rejection described above.

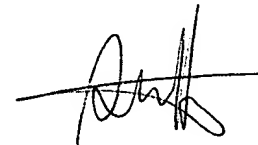

Art Unit: 2178

***Conclusion***

23. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory J. Vaughn whose telephone number is (571) 272-4131. The examiner can normally be reached Monday to Friday from 8:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen S. Hong can be reached at (571) 272-4124. The fax phone number for the organization where this application or proceeding is assigned is (571) 272-2100.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
